Figure Table DH-27

Category Name Data Modeling

Actionee HAIS

Sub Category V0 Migration

Subject Missing AVHRR PathFinder Server?

Description of Problem or Suggestion:

AVHRR PathFinder is one of the 3 V0 datasets targeted for Release A migration, yet none of the GSFC Servers seem to accommodate this dataset.

Originator's Recommendation

Explain which data server will hold AVHRR PF data.

Resolution should be completed by the end of March 1995.

HAIS Response Date 3/30/95

The AVHRR Pathfinder collection, which has been chosen for high-priority release-A migration into ECS, was analyzed along with the other high-priority release A datasets. However, it was not documented in OMT form prior to PDR. This has since been accomplished. The SDPS Database Design and Database Schema Specification, 311-CD-002, has been augmented since the PDR draft, and this server definition was one of the added items. Server 46 (GSFC, AVHRR, Land Surface Vegetation) has been identified as the server for holding AVHRR PF data.
